

Clean Set of Claims

B1
CPC

1. A Caller ID device, comprising:
a memory adapted to store Caller ID data associated with an incoming call; and
a processor adapted to selectively store the Caller ID data in said memory based on an off-hook status of a telephone.

B2

11. A telephone, including a Caller ID device, the Caller ID device comprising:
a memory adapted to store incoming Caller ID data associated with an incoming call; and
a processor adapted to selectively store the Caller ID data in said memory based on an off-hook status of said telephone.
